

### Meet Allison!

"I grew up on a farm outside of Fairfax, SD. I spent as much time as possible outside with the animals. I have always been drawn to horses specifically. I bought my first horse when I was 16 and have been growing my herd since. I received my BA in Interdisciplinary, specializing in Special Education and American Sign Language, from Augustana University in 2020. I have worked closely with people of different abilities through schools, residential and volunteering. I have experience being a therapeutic riding instructor and independent riding instructor. My true passion is to help individuals while being around horses."
